

Course 2 Foodborne Outbreak Investigation and Response Team Roles and Responsibilities: Part B

OVERVIEW

The goal for this online course is to train public health professionals and other personnel to rapidly identify, investigate and implement control measures for a foodborne disease outbreak to reduce the incidence of foodborne illness. This course is part of a seven course series.

SCOPE

This course identifies the surveillance systems relevant for foodborne outbreak response and emphasizes the differences of team dynamics during response to routine, non-routine, and complex foodborne outbreak response.

TARGET AUDIENCE

The target audience is epidemiologists, environmental health specialists, laboratory personnel, and any others who would be involved in a foodborne outbreak investigation and response.
