

# Isolation and Quarantine Response Strategies in the Event of a Biological Disease Outbreak in Tribal Nations

## Course Overview

The purpose of this performance level course is to provide tribal nations with the knowledge, skills and abilities necessary to effectively detect, respond to, and mitigate a disease outbreak, using a whole community approach. This course will include a practical exercise that will be designed specifically to meet the needs of tribal communities.

## Final Exercise

Participants will apply the knowledge and skills learned through a practical exercise that will require them to describe zoonotic response plans, partners and distinctive aspects of emergency response in tribal communities. Participants will be able to apply lessons learned to implement isolation and quarantine strategies. Participants will select appropriate personal equipment and demonstrate the knowledge and skills necessary to maintain responder safety when using personal protective equipment while responding to a biological disease outbreak.

## Target Audience

Tribal community representatives and other officials from emergency management, public health, law enforcement, fire, cooperative extension, medical services, environmental health, veterinarians and other animal health officials.

## OFFERED BY

The Center for Agriculture and Food Security and Preparedness  
The University of Tennessee College of Veterinary Medicine  
2407 River Drive, A213  
Knoxville, Tennessee 37996
