

Course Goal:

To prepare participants to utilize and implement effective sharing of information and intelligence to enhance food safety and security related to food importation and transportation.

Key Learning Points:

- Global movement of food
- Key vulnerabilities of food chain
- Food import process
- Definition of information vs. intelligence
- Observing, assessing and reporting problems
- Seven signs of suspicious activity
- Key benefits of sharing information

Key Risk Areas:

- Food transportation consistently ranked as one of the most vulnerable links in our food chain
- Transportation is complex global network
- Food travels 1,500 or more miles from production to consumption
- In a day one may easily consume food from over 10 countries

Target Audience:

Suggested participants include: law enforcement, state Fusion Center personnel, emergency managers and responders, Extension, public health, food and agriculture industry professionals, transportation industry and federal, state, local, tribal and regional officials.

Time Allocation:

This course is designed to be presented over one day and is typically delivered from 8am-5pm. The course includes a hands-on, practical exercise utilizing the skills learned.
