Partial funding support for this course is provided by the University of Tennessee College of Veterinary Medicine, and the U.S. Department of Agriculture.
The UT College of Veterinary Medicine will host an in-depth training course on Foreign Animal and Emerging Diseases in Knoxville, Tennessee from August 11th-13th, 2015. This event is jointly sponsored with the U.S. Department of Agriculture and includes speakers with international expertise on foreign animal and emerging diseases.

This course provides an excellent opportunity for veterinarians, veterinary technicians, veterinary students, public health students and professionals, and Extension. Other allied professionals who are responsible for foreign animal disease outbreak response will find this training beneficial. Individuals in private practice, academia, industry, the military and government are encouraged to attend.

Topics will include:

- Impact of Transboundary Animal Diseases on Global Economies and World Food Supplies
- Foot and Mouth and other Vesicular Diseases
- Highly Pathogenic Avian Influenza
- Newcastle Disease
- Public Health Considerations of Emerging Animal Diseases
- Foreign Animal Disease in Wildlife
- Classical and African Swine Fever
- Feral Swine Disease Monitoring
- Porcine Epidemic Diarrhea Virus
- Screwworm
- Heartwater
- Federal and State Responses to Foreign Animal Diseases
- Foreign Animal Disease Scenarios
