

NUCLEAR MEDICINE SHORT COURSE

March 26-28, 2010

The University of Tennessee will offer a Nuclear Medicine Short Course March 26-28, 2010. The course is intended as a general review of nuclear medicine. It will include: reviews of the basic principles of nuclear medicine and image processing, common nuclear medicine imaging procedures, interpretive principles, and case examples. The majority of topics will be small animal applications, but the course will also include a review of equine nuclear medicine.

Program Participants:

- Dr. Federica Morandi, Course Coordinator – email: fmorandi@utk.edu
- Dr. Gregory B. Daniel

Registration Fees:

- Lecture presentations
- Film reading session
- CD containing: lectures, case examples & handouts (windows platform)
- Two buffet lunches
- One dinner
- Refreshment breaks
